

Generosity

Picture Match

Objective: To generously share information with the rest of class.

Photocopy some pictures from 'Virtues in Action' Generosity book and cut them into two parts. Divide the class into groups according to their seating arrangement. For example, it might be preferable to group the students in the same row together. Give each child in a group half of a picture. The group members then walk around the room (or row), looking at each other's pieces, until they meet up with the person who has the piece which completes their picture. When they think they have met someone whose picture piece completes theirs, they bring their pieces to the teacher, who lets them know if they are correct. When all the children have completed their pictures, they share with the class something about how their picture shows Generosity.
